
Mutation burden: does the AID-dependent signal transfer?
Mutational signature
A
J_H4 in mice
Illumina, PRJNA973112
Mutations per 10^3 bp
Wt
7 mice
Ldha-deleted
7 mice
AID-null
4 mice
B
AID variants in CH12F3
Illumina, PRJNA918596; 4 replicates each
AID
R50E
R174E/
R178E
empty
vector
C
AID against R174E/R178E
CH12F3 calls; numbers in bars are calls
27 calls
S5F index 2.46
54 calls
S5F index 0.73
Share of calls (%)
C→T or G→A
other G:C
A:T
Indels: beyond substitutions
Repair: does the spectrum follow UNG?
D
Indels in Ramos clones
Illumina, PRJNA820976; every library at 20,000 reads
Indels called per clone library
Wt
HMCES
KO
AID
KO
