
A
JH4: background along the amplicon (500 reads per library)
AID-active (mean)
KO1 (AID-null)
KO2 (AID-null)
KO3 (AID-null)
controls only, own scale
between controls: Spearman r = 0.12–0.20
(one control explains 1–4% of another's variation)
Mismatches, Q ≥ 20 (%)
JH4 position
B
Sμ: background along the amplicon (2,000 reads per library)
AID-active (mean)
KO1 (AID-null)
KO2 (AID-null)
KO3 (AID-null)
controls only, own scale
between controls: Spearman r = 0.29–0.45
(one control explains 9–20% of another's variation)
Mismatches, Q ≥ 20 (%)
Sμ position
C
WT3 (wild type): 5,643 at called sites, 34 other mismatches
Reads (sorted by clone)
JH4 position
D
KO1 (Aicda−/−): 0 at called sites, 35 other mismatches
Reads (sorted by clone)
JH4 position
