
A
Single-read estimate
mean recovery 95%
Change in single-read estimate
One-read mutations planted
B
Power by size of difference
unique density, CV 0.95; this paper's own contrasts are 38–141-fold
Power at α = 0.05
Animals per group

C
UMI consensus (simulated)
every read
UMI consensus
False calls per library
0.7
J_H4 polyclonal
J_H4 low load
N114 V_H subclonal
N114 V_H low load
D
UMI consensus on real reads
raw reads 9.5%
all 103: 0.17%
57-fold
(35–99)
Error per base (%)
consensus
all errors
substitutions
3–4 n = 4
5–9 n = 7
10–19 n = 15
≥20 n = 77
Reads per molecule (n, molecules)
E
Planted indels
false calls/library: J_H4 0.33, N114 V_H 0
below the 3-read floor
Recall
J_H4 72% at ≥ 3
N114 V_H 91% at ≥ 3
Reads with the indel
