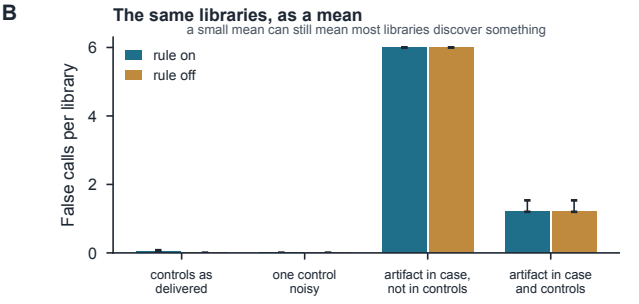
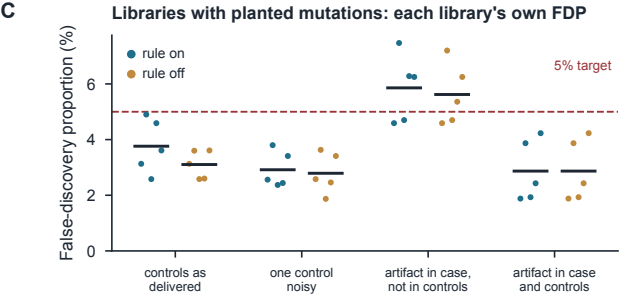
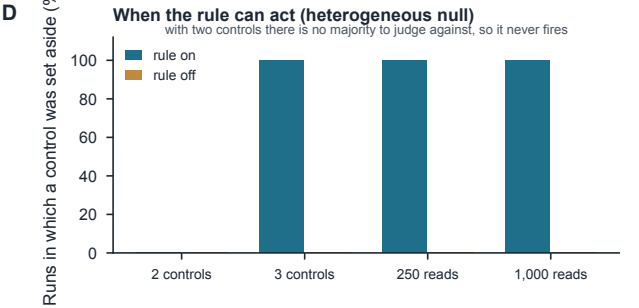
A
All-null libraries: any discovery at all
every call here is false, so one call makes this library's FDP 1
Libraries with any call (%)
rule on
rule off
5%
controls as delivered
one control noisy
artifact in case, not in controls
artifact in case and controls



B
The same libraries, as a mean
a small mean can still mean most libraries discover something
False calls per library
rule on
rule off
controls as delivered
one control noisy
artifact in case, not in controls
artifact in case and controls



C
Libraries with planted mutations: each library's own FDP
False-discovery proportion (%)
rule on
rule off
5% target
controls as delivered
one control noisy
artifact in case, not in controls
artifact in case and controls



D
When the rule can act (heterogeneous null)
with two controls there is no majority to judge against, so it never fires
Runs in which a control was set aside (%)
rule on
rule off
2 controls
3 controls
